

iBOTICX LAB IS AN **IOT AND MACHINE LEARNING** DIVISION OF ESOLUTIONS GROUP, WHERE INNOVATIVE PRODUCT R&D, CENTRE OF EXCELLENCE(COE) SETUP AND TRAININGS WILL BE HANDLED.

INTERNET OF THINGS(IOT)

What We Do?

iBoticx always intent to provide best-in-class IoT solutions for your business needs, and enable you to harness the power of "connected world".We make your work environment more productive,smarter and connected.Our solutions will help your company to harness the potential of Aftermarket Intelligence and make your business stand out of the crowd.

Our Domain Expertise

Our team is highly experienced in Edge Device Development, Production Analytics, Smart Connected Operations for factories and Aftermarket Intelligence & Customer Experience. Our proficient team is skilled in choosing the right Sensors, Actuators and devices to communicate and analyze real-time data to provide intelligent solutions.

IOT Edge Device Development

Center of Excellence - Setup

Data Science & Machine Learning

iBOTICX LAB

CENTER OF EXCELLENCE (COE)

What Is Centre Of Excellence?

The CoE is a hub of end-to-end IoT learning and research platform for Startups, Corporates and Academics. A CoE will host physical lab facility to research and to develop prototypes for addressing various domestic and industry needs.

Core Aim:

- To shape the young minds for Global Industrial IOT & Machine Learning(ML), and make them industry ready by bridging the gap between current academics and industry expectation.
- To enable an IoT platform for Universities and Colleges to setup their own CoE and its related curriculum.
- To train startups to leverage cutting edge technologies to build industry ready products.
- Our core focus training will be on Manufacturing, Healthcare, Water & Energy sectors

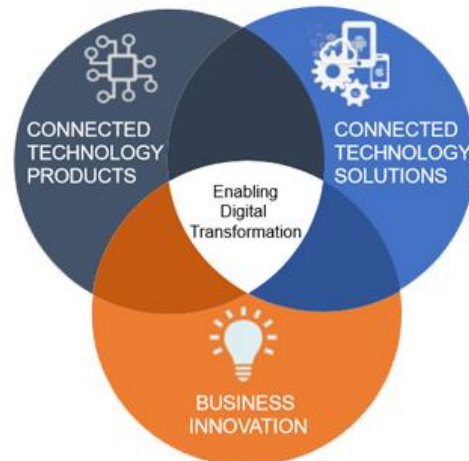

RESEARCH & DEVELOPMENT

Our R&D team is always hungry for innovative solutions that could enrich human life style better and make our domestic and business lives easier than ever before. We always want our lab to be an breeding ground for innovative and creative ideas.

IBOTICX LAB

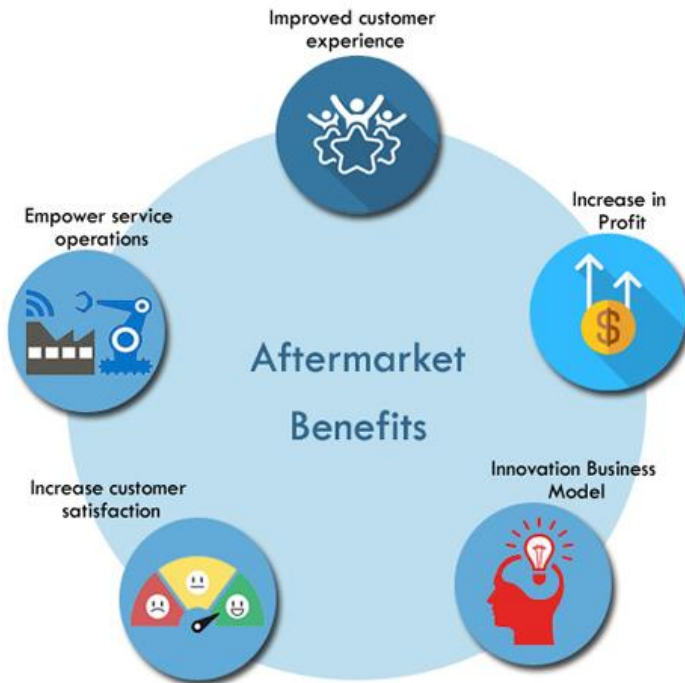

AFTERMARKET INTELLIGENCE

Aftermarket Intelligence:

Today's Digital technologies enable products or services to be always connected, in intelligent way and self-managing. By using a combination of IoT, Telematics and predictive intelligence services and cloud computing.

Core Aim:

- To help customers by end-to-end *aftermarket intelligence* solutions across industry verticals from digital transformation consulting, physical product re-engineering, communication of product data through wireless/wired topologies, hosting of M2M cloud, development of web/mobile applications.
- To improve the after-sale customer experiences with products and get continuous engagement with your customers.

CONNECT... US

- To transform the way, you create, operate and service the products using Aftermarket Intelligence.
- To experience the Aftermarket Intelligence demo.
- To understand more about Aftermarket intelligence solutions.
- To see our customer case studies.
